

## What's new !!

Straight shape super flow funnel 88mm

Straight shape super flow funnel 88mm x4

Current model VS Straight shape super flow funnel

The funnel is installed image (S2000 sport injection KIT)

New design air funnel for TODA sport injector KIT.

The shape of the funnel now maintains a straight form to near the lip.

Increased mid-range torque was found when comparatively tested against TODA Racings conventional air funnel with a 2.4L F20C TODA Racing specification engine.

The power curve was also found to be smoother higher up the rpm range, showing setting up of the engine map to be easier.

Also using this funnel increased mid rang by up to 10hp, as well as 1-2kgm of improved mid rand torque.

Thoughts with 50mm TODA Racing throttle bodies should try this.

Straight shape super flow air funnel for TODA 50mm Sport Injection KIT 88mm/length
