|--------------------|---------------|-------------|
| ● 88mm Trumpets | 17100-BP0-458 | 398,000 JPY |
| ● 63mm Trumpets | 17100-BP0-456 | 398,000 JPY |
| ● 33mm Trumpets | 17100-BP0-453 | 398,000 JPY |
| ● BP ISCV Tank KIT | 17115-000-001 | 41,000 JPY |

*ISCV unit is not included.

This is sold separately.

Toda Racing is pleased to announce the release of Sports Injection KIT for the Mazda BP engine. The throttle valve size is 45mm, and the trumpet length has 3 choices.

NOTE

Fuel injectors are not included. (Designed to use with stock injectors.)

The parts shown in the above images are only provided. Hoses, fittings, and wires need to be prepared.

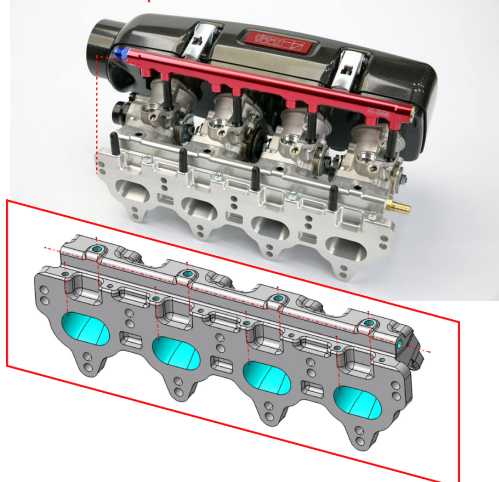

This product does not work with standard ECU.

The installation by a shop with technical knowledge to set up an individual throttle body kit is required.

The stock NB ISCV unit can be used for the ISCV Tank KIT.

Dry Carbon Surge Tank can be also use with 33mm trumpets

Point!

The intake manifold is machined by a high precision machining center. Additional outputs for negative pressure from each ports are included.

Point!

The brake master vacuum will be connected to the line where every port is joined, and helping to boost negative pressure.

Point!

ISCV Tank KIT is recommended for smooth idle in any condition.
